Greetings Boaters!

We hope that you have been cruising the seas a lot this summer and having a great time! As we approach the end of the season, we are excited about a new opportunity that we want to share with you.

We are always considering how to do things better for you, whether timing is an issue or cost. We are excited about our second year offering the "winter work program". This program encourages customers to think about any major repairs or upgrades that their boat and/or engine may be in need of and scheduled them with us this fall, for completion over the winter, at discounted costs. This greatly helped many boaters get on the water sooner this past spring and saved them serious money as well! What kind of discounts? Labor reduced to \$82/hr and parts/materials -10%!!

To qualify for the winter work discount program, the services would need to be a minimum of \$1,200. A deposit would be required with the balance due upon completion. There is no charge for rewrapping of the boats or for Jill or Drew shoveling it out of the snow ☺

What kinds of jobs? Here are some examples of type of jobs that we will be scheduling for the winter. Also, please let us know if you have something in mind!

- Outboard Repower!
- New Electronics!
- Fuel Tank Replacement
- Extensive Teak/Wood Refinishing
- Electrical Re-Wiring
- Lower Unit Re-Sealing
- Fiberglass Repair/Restoration Work

Please let us know if you have any questions. We are flexible and want to help you take advantage of this opportunity. Interested in getting things quoted and scheduled for winter work? Just tear off the form below and send it back to us.
